

About us

Background

Gentueri is an expert in biological sample collection with over 30 years of experience, helping improve health and safety by making genetic screening available to all, bringing closure to families of mass disasters and crimes, and supporting critical research.

Our customer-centric approach

We take a customer-centric approach by partnering with laboratories to improve the quality of their results and laboratory efficiencies.

We do this by advancing the collection, management, and preservation of biological samples with easy-to-use, reliable, and non-invasive devices.

We design and manufacture our devices in our cutting-edge facility in America's heartland of Wisconsin, USA!

Products and Services

Oral Sample Collection

Non-invasive sample collection devices that are easy to use, simple to ship, and biobank at ambient temperature

CollectEject™ Oral

Regular size swab head: recommended for liquid handlers and manual processing

Large size swab head: recommended for manual processing only

- Easy to use
- Reliable DNA quality and quantity for NGS, PCR, Microarray, STR, and more
- Minimize manual manipulation in the lab
 - Budget-friendly pricing & available customizations

Products and Services

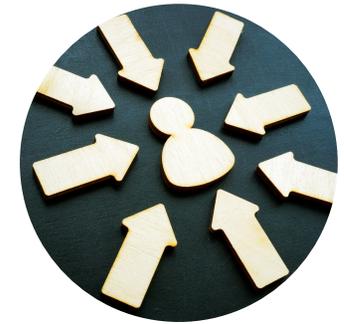

GenSwab™

In partnership with Ahlstrom-Munksjö

- Easy to use
- Biobank at ambient temperature for over 20 years without DNA degradation
- Reliable DNA quality and quantity for NGS, PCR, Microarray, STR, and more
- Flat design with dry preservation for easy mailing without biohazards

Why Choose Us

We pride ourselves in partnering with you to develop and implement an effective sample collection solution

Our in-house manufacturing capability enables us to customize our solutions to meet your needs
